The **Brokk 400** offers higher capacity and robustness, along with its renowned mobility and versatility. All parts of the undercarriage are upsized to make it the perfect machine for all applications that require extensive tracking. The upgraded hydraulic system and improved stability gives you an unparalleled performance even with the most demanding tools. With a reach of almost 7 meters (23.1 feet) and a full 360-degree turning radius, the Brokk 400 provides excellent access to the work area without the need for time-consuming repositioning.

**Applications**

A favorite for the toughest heavy-duty work, such as removing heavily-reinforced concrete vaults and foundations with speed and accuracy.

The Brokk 400 weighs 5100 kg and can handle tools up to 600 kilos in weight. With this impressive power-to-weight ratio, the machine has the muscles to take on heavily-reinforced concrete structures while eliminating the need for expensive shoring. It’s also very productive in open spaces. And in all applications, the operator remains at a safe distance, away from vibration and falling debris.
