

# CYLINDER PROTECTION

## OPTIONS INFO

- With extra well-protected cylinders your Brokk will be extremely durable and with less cylinder damage
- A solution that gives the already flexible three-part arm system even more reliability
- Suitable for hot applications

## Heat and impact protection for cylinder 2 and 3

Combined with other heat options the heat and impact protection for cylinder 2 and 3 gives you the freedom to start the job earlier in hot environments without risking breakdown due to heat.

### When:

- Extra protection against heat and impact is needed for the cylinders

### Fact:

- Great option to all machines in the Brokk family

### Note:

- If you want to work in hot environments you should combine the heat and impact protection for cylinder 2 and 3 with other heat resistant options

### Application:

- All
