

# HEAVY DUTY ARM 3

## OPTIONS INFO

- When power needs to be even more heavy-duty
- Suitable for tough hammering and less need for different tools
- Protects cylinder 4 in refractory applications

## Heavy duty arm (with direct connected breaker)

Perfect for delivering heavy-duty power where you need it most.

### When:

- If you need extra heavy-duty power for the breaker. The breaker is direct connected to the arm and cylinder 4 is well protected
- Ideal for refractory jobs or tough hammerings

### Fact:

- Option for Brokk 500 and 520D

### Note:

- If you want to use several different tools we recommend the standard arm 3 instead

### Application:

- Tunneling, Mining and Metal Processing
