

BROKK STEEL TRACKS

- OPTIONS INFO**
- For work in hot environments
 - Long lifetime
 - Suitable on sharp material

GOOD TO KNOW Steel caterpillar tracks instead of rubber tracks

Steel tracks instead of rubber enable you to start the job in warm environments earlier.

When:

- You want the machine to work on hot and sharp surfaces

Fact:

- Option for all Brokk machines

Note:

- Might have less grip than rubber tracks on certain surfaces

Application:

- Construction, Tunneling, Mining and Metal Processing
