

# PULVERIZER

*for the CC560 Concrete Crusher  
as a retrofit option*

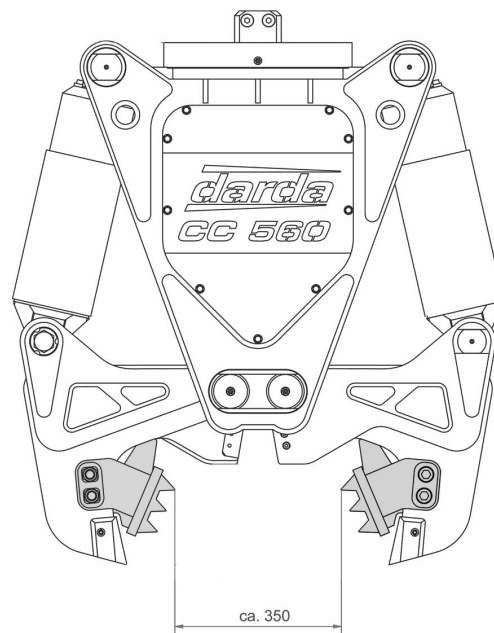

**NEW!**

## Product Information

**Art.No. 6560 0415 80** (2 pieces are required per crusher)

- Pulverized concrete as a fine debris for simple evacuation
- Separates steel and concrete for clean recycling
- Breaks and cuts concrete up to 25 cm in one step
- Wear resistant because of high-quality steel and specially welded pulverizing teeth
- Quick and easy to install \*

\* To attach the pulverizing plates it is necessary to first drill mounting holes in the crusher jaws. (holes are pre-drilled on crushers with serial numbers greater than 259) Crushers, which were previously delivered, can be re-tooled at our company. The re-tooling price is dependent on the amount of work required.
